

Jared Reichle

Principal Software Engineer | Systems Integration | Automation & Infrastructure

SUMMARY

Senior-level software engineer with 5+ years of experience designing and delivering production-grade automation frameworks, system integration solutions, and test infrastructure in high-reliability and regulated environments. Expert in Python-based systems, CI/CD, and hardware/software integration. Proven ability to reduce system test cycles, improve developer velocity, and own complex systems end-to-end.

CORE SKILLS

Programming: Python, C++, C, TypeScript, JavaScript, Bash, PowerShell

ML & Data: PyTorch, scikit-learn, NumPy, Pandas, model evaluation

Backend & Systems: REST APIs, data pipelines, automation frameworks, system design

DevOps & Infra: CI/CD, Docker, Containers, Ansible, Git, Azure, Linux (Debian/Ubuntu/RHEL)

Embedded: VxWork, device drivers, real-time systems

Frontend: React, Node.js, Next.js

Databases: PostgreSQL, SQLite

EMPLOYMENT

Principal Software Engineer

Northrop Grumman

August 2022 - Present

- Architected and implemented automated system test frameworks, reducing test cycles and improving release confidence
- Built Python API clients and custom C++ device drivers to integrate distributed software systems with lab hardware
- Designed and deployed CI/CD pipelines and containerized workflows to standardize builds, testing, and deployments
- Developed internal React-based tools for real-time lab and test visualization, improving operational awareness
- Mentored engineers and drove documentation standards, improving onboarding speed and code quality

Electronics Engineer

United States Air Force

July 2020 - July 2022

- Delivered and sustained mission-critical software for F-16 subsystems, resolving defects and implementing new features
- Integrated cross-team software updates into flight simulators, accelerating validation and regression testing
- Diagnosed and hotfixed simulator defects, reducing field issues and improving system reliability

Systems Engineering Intern

Micron Technology

June 2018 - August 2018

- Debugged memory product failures on proprietary customer platforms and produced system-level technical analyses

EDUCATION

Georgia Institute of Technology - M.S. Computer Science

Jan 2025 - Present

University of Idaho - B.S. Electrical Engineering

Aug 2016 - May 2020

CERTIFICATIONS AND STATUSES

CompTia Security+ (SY0-701)

Oct 2025

Active Top Secret Clearance

June 2023
