EDUCATION

Georgia Institute of Technology

Masters of Science in Computer Science

Specialization: Artificial Intelligence

Online

Expected Summer 2027

University of Idaho

Bachelors of Science in Electrical Engineering

Moscow, Idaho

Aug 2016 - May 2020

WORK EXPERIENCE

Northrop Grumman

Senior Software Engineer

Roy, Utah

August 2022 – Present

- Developed backend software, automation frameworks, API clients, and hardware device drivers used to integrate and test complex defense systems.
- Served as a primary developer for the WIM application, building Python services, REST APIs, PostgreSQL integrations, and a React-based interactive lab interface.
- Helped create an automated testing framework, reducing some test cycles from roughly three weeks to under an hour while supporting modular drivers and more than 50 concurrent test sessions.

United States Air Force

Electronics Engineer

Hill AFB, Utah

July 2020 – July 2022

- Developed and maintained software for Air Force simulation and training systems, implementing pilot-requested features and subsystem updates.
- Diagnosed integration issues and delivered targeted fixes in complex simulation environments, including debugging and rapid hotfix support.
- Improved development efficiency by automating software builds, testing, and integration workflows for multiple simulator platforms.

SKILLS

- Backend and API Development: Python, FastAPI, Flask, REST APIs, PostgreSQL, SQLAlchemy, Async architecture
- Test and Lab Automation: pytest, unittest, Hardware-in-the-Loop Testing, Automated Test Procedures, Concurrent Test Execution, Equipment Control
- Hardware and Instrumentation Integration: RS-232, TCP/IP, USB, SCPI, Serial Communications, Device-Driver Development, VxWorks
- Frontend and Engineering Interfaces: React, TypeScript, JavaScript, Interactive Lab Mapping, Data Visualization
- DevOps and Software Delivery: Docker, Git, GitLab CI/CD, Azure DevOps, Linux, Ansible

PERSONAL PROJECTS

HOMELAB INFRASTRUCTURE

- Replaced paid cloud tools with self-hosted services using Proxmox (Media, AdBlocking, Wireguard Remote Access, etc.)
- 100% satisfaction rate from 1 user (my spouse)

TELESCOPE CONTROL BRIDGE

- Connected Stellarium software to control my Orion XX14G telescope. Allows for remote execution of object finding.

CERTIFICATIONS & ACHIEVEMENTS

CompTIA Security+ (SY0-701)

Earned Oct 2025

SDS Innovation of the Year Top 5 Finalist

Earned June 2023

Active Top Secret Clearance

Earned 2025
