

Jared Reichle

SUMMARY

Software engineer with a track record of driving performance gains, reducing latency, and building systems that scale reliably under heavy load. Passionate about optimizing code for maintainability, refining architectures, and delivering features that move business-relevant metrics. Strong grasp of algorithms and system design, with a hands-on approach to solving complex backend challenges and pushing for measurable results.

EDUCATION

Moscow, ID	University of Idaho	August 2016 - May 2020
- Major: Electrical Engineering, B.S.E.E. - Certificate (Minor): Computer Science		
Atlanta, GA (Online)	Georgia Institute of Technology	January 2025 - Ongoing
- Degree: Online Masters of Science in Computer Science - Expected graduation: Summer 2027		

EMPLOYMENT

Software Engineer	Northrop Grumman	August 2022 - Present
Sentinel LGM-35A - Built test tools and automation frameworks from scratch, accelerating system test cycles - Created API clients and device drivers that integrated web tools with lab hardware - Developed a React app for interactive lab visualization, improving team situational awareness - Established DevOps infra with CI/CD pipelines, enhancing software delivery speed and reliability - Mentored new engineers, reducing onboarding time and improving team velocity by refining documentation and workflows		
Electronics Engineer	United States Air Force	July 2020 - July 2022
F-16 Fighting Falcon Software Maintenance - Managed customer-driven software changes, resolving bugs and adding features to F-16 subsystems that improved mission-readiness - Integrated cross-team feature updates into flight simulators, accelerating validation and reducing test cycles - Identified, documented and hotfixed simulator issues, decreasing field defects and improving system reliability		
Customer Systems Engineering Intern	Micron Technology	June 2018 - August 2018
Systems Engineer Debugging Memory Products - Debugged memory product failures on proprietary customer systems, increasing first-call resolution rates - Produced technical reports and directly interfaced with customers to drive faster problem closure and improved product trust		

SKILLS

Languages: C++, Python, JavaScript, TypeScript, MATLAB, Bash

Frameworks/Tools: React, Ansible, Git, Azure, Jira, Confluence

Databases: PostgreSQL, SQLite

OS & Embedded: Windows, Linux (Debian/Ubuntu/RHEL), VxWorks

Other: IBM Jazz, DOORs, unit/static testing, Agile, DevOps pipelines, Containers

Soft Skills: Ownership of products, clear technical communication, cross-team collaboration, mentoring & onboarding, troubleshooting complex systems, translating user needs into engineering requirements

PROJECTS

Home Lab Servers

- Built home lab with Proxmox cluster on surplus hardware
- Set up VMs and containers to explore OS and networking.

FPGA Data Acquisition and Control System

- Created a modular and extendable FPGA data acquisition and control system for a laser interferometer closed loop system.
- Developed in a team with SystemVerilog to simulate designed feedback loop on Zynq 7010 SoC.
- Link: http://mindworks.shoutwiki.com/wiki/FPGA_Data_Acquisition_and_Control

Circuit Synthesis Algorithms

- Created a python project to take an N-input/output 'black-box' circuit characterized by its sweeping frequency response data set and convert them into RLC circuit branches.
- Worked independently over the course of a semester.

EMG Controlled Drone

- Worked in a multi-disciplined team to create a quad-copter controlled by impulse signals generated from forearm and hand movements.

LEADERSHIP AND VOLUNTEERING

Church Leader

2016-Present

Resonate Church - Helped men and women develop spiritual, mental and emotional character to lead effective lives. With the hope for them to impact their communal spheres, ultimately making the world a better place.

Volunteer

2022-Present

Volunteers of America, Rescue Mission of Salt Lake - Have volunteered time helping with meal prep and donation sorting at homeless and resource centers.

CERTIFICATIONS AND STATUSES

CompTia Security+ (SY0-601)

Date: 10/2022

Active Top Secret Clearance

Date: 06/2023
